

Meguiar's Quik CLAY

Detailing System Le Système Gomme

Keep out of reach of children. Contains Mixture of 5-chloro-2-methyl-2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one. May produce an allergic reaction. Refer to Safety Data Sheet for component % unknown values (www.meguiars.co.uk/downloads). Ingredients required per 648/2004: Contains: Perfumes, Mixture of methylchloroisothiazolinone and methylisothiazolinone (3:1).

Meguiar's UK Ltd, 3 Lampport Court, Heartlands, Daventry, NN11 8UF, +44 870 241 6696

Tenir hors de portée des enfants. Contient Mélange de : 5-chloro-2-méthyl-2H-isothiazolin-3-one et de 2-méthyl-2H-isothiazolin-3-one. Peut produire une réaction allergique. Consulter la fiche de données de sécurité pour connaître les pourcentages inconnus des composants (www.meguiars.fr). Ingrédients requis selon le Règlement Détergents 648/2004: Contient : Parfums, Mélange de 5-chloro-2-méthyl-2H-isothiazolin-3-one et de 2-méthyl-2H-isothiazolin-3-one (3:1).

Meguiar's France - 3 rue de Verdun - Bât. D - 78590 Noisy le Roi

0 800 800 193

Meguiar's Belgium, Polish & Cleaning Products, Beraarbaan 85, 2860 Sint Katelijne Waver. 015 560 460

Darf nicht in die Hände von Kindern gelangen. Enthält Gemisch aus: 5-Chlor-2-methyl-2H-isothiazol-3-on [EG nr. 247-500-7] und 2-Methyl-2H-isothiazol-3-on [EG nr. 220-239-6] (3:1). Kann allergische Reaktionen hervorrufen. Angaben zu den Bestandteilen mit unbekannter Toxizität und Gewässergefährdung siehe Sicherheitsdatenblatt (www.meguiars.de/downloads). Informationen nach 648/2004/EG: Enthält: Duftstoffe, Mischung aus Methylchlorisothiazolinon und Methylisothiazolinon (3:1).

Meguiar's Quik CLAY

Detailing System Le Système Gomme

TRY THE TOUCH TEST

Since many contaminants that are bonding to your paint are hard to see, use this fool-proof way to know when you need to use Meguiar's Quik Clay.

After you wash and dry your car (and your hands), rub the face of your hand over the top paint surfaces. Your sense of touch will detect what your eyes can't. If the paint doesn't feel as smooth as glass, you need to use Quik Clay.

By detecting and removing bonded contaminants early, you can save your paint and enjoy deeper color and greater shine.

PAINT IS SUBJECTED TO CONTAMINANTS DAILY

Meguiar's Quik CLAY

Detailing System Le Système Gomme

Detailing System Le Système Gomme

Makes paint as smooth as glass

Safely removes bonded contaminants such as:

- Tree sap mist
- Paint overspray
- Road Contaminants
- Airborne salts

THE SAFE, EASY WAY TO REMOVE BONDED CONTAMINANTS

WHAT ARE BONDED CONTAMINANTS?

Whenever your car, bike, truck or airplane is outside, whether stationary or in use, it is continually exposed to a full spectrum of contaminants. Some will wash off easily, others will not and those become bonded contaminants, which destroy slickness while gradually masking reflectivity and gloss...eventually etching into the finish.

Note: Washing and waxing cannot remove bonded contaminants.

HOW DOES IT WORK?

Meguiar's Quik Clay is completely non-abrasive, yet has the ability to grab hold of bonded contaminants and literally pull them off the finish, leaving it as smooth as glass.

This new, alternative technology is especially important on today's clear coat paint finishes, which are easily scratched and swirled when traditional abrasive cleaners and rubbing compounds are used.

If you have questions about how to care for your vehicle's appearance, call our trained experts in your local area. Contact details located on the inside instructions sheet or go to:
