12.5. Results of PBT and vPvB assessment

The substance/mixture does NOT contain PBT/vPvB substances according to Regulation (EC) 1907/2006, annex XIII

12.6. Other adverse effects

Soil bacteria convert ammonia into nitrate, which can be absorbed by plants or denitrified by microorganisms into nitrogen and nitrous oxide. In water, ammonium and phosphate ions can cause eutrophication, hence an increase in algae growth. The decomposition of algae can reduce oxygen which, if substantial, could cause asphyxiation of other aquatic organisms.
